Honorable Hubert H. Humphrey  
United States Senate  
Washington 25, D.C.

Dear Senator Humphrey:

This is in reply to your letter of 20 March 1962 forwarding letters of 23 February 1962 and 22 March 1962 from [redacted] concerning [redacted] offer to participate in the service of the Central Intelligence Agency."

STAT

For your information, representatives of this Agency have been in contact with [redacted] for a little over two years. During that period he has provided several useful information reports.

Regular staff employment by this Agency is not feasible because he is not a citizen of the United States. We have explored the possibility of utilizing his services in a more formal capacity than at present, but are unable to offer him anything at this time. Should a suitable position arise, [redacted] would be given every consideration.

I want to thank you for bringing [redacted] to my personal attention. The positive expression of interest and desire to assist in the conduct of affairs of our country by an individual with [redacted] training and background is most heartening.

Honorable Thomas G. Morris  
House of Representatives  
Washington 25, D. C.

Dear Mr. Morris:

Thank you very much for bringing to my attention the article from the Christian Science Monitor regarding the use of "ball lightning" as a defensive weapon.

Observations of ball lightning and theoretical explanations for it have been made since the mid-1700s. The recent interest in the subject was instigated by a hypothetical model of the phenomenon first suggested by the Soviet scientist P. L. Kapitzin in 1955. Since then, numerous attempts have been made to explain the phenomenon, both by Soviet and Western scientists, but most of these are in the realm of theory and speculation. The first known publication of a weapons application was the publication of a non-technical article by G. I. Babat in a popular Russian magazine, as mentioned in the Monitor article.

Work in the United States has been in progress for some time investigating the possible application of ball lightning as a defensive weapon system. The basic research is being carried out by the Air Force Office of Aerospace Research. In addition to their work, several independent industrial concerns have been carrying out research in this general area. A most lucid and readable account of the Armour Research Foundation work on a device similar to that proposed by Babat can be found in the September 12, 1960 issue of Electronic News.

The use of ball lightning as a weapons system is a subject which appeals to the popular imagination and, consequently, often appears in exaggerated forms in non-technical popular magazines. Frequently it is difficult, even for the technical personnel, to sift the fantasy from technically feasible proposals.

NEGATIVE REGISTRY FILE

The Central Intelligence Agency has been watching developments in this area rather carefully for some time. We do not believe that the Soviets have perfected such a weapon system, nor do we expect them to do so in the foreseeable future. Accordingly, it is not considered possible that a weapon such as this was used to down the U-2 aircraft piloted by Mr. Powers.

While we do not regard the information in this letter as technically classified, we would prefer that in any use you may make of the information it not be attributed to the Agency. Please let us know if there is any other way in which we can be of assistance.

Sincerely,

(Signed) JOHN A. McCONE

MEMORANDUM FOR: THE DIRECTOR

Attached is a proposed letter for your signature to Representative Morris. This was prepared in OSI and concurred in by Pete Scoville. Representative Morris had enclosed an article on "fireball lightning" and queried whether or not this could possibly have been a weapons system used to down the Powers U-2.
